## Technical Data Sheet

## CPE -135A (Impact Modifier)

## CHARACTERISTICS

CPE-135A is a chlorinated polyethylene resin in white powder form. This resin, as impact modifier, has excellent multiple physical properties and good compatibility with PVC. In the right processing condition, a three-dimensional netted structure can be formed inside rigid PVC products with the resin. It has good impact resistance at normal and low temperature and is also corrosion-resistant to various acids and alkalis.

## APPLICATIONS

This resin is designed for use in window PVC profiles, intake pipe, box pipe of cold wire, u-PVC drainage pipe, PVC foam and extruding plates as well as PVC press plate but is also useful in various other applications.

## SPECIFICATIONS

| Property | Value | Test Method |
| :---: | :---: | :---: |
| Chlorine Content, (\%) | $35 \pm 1$ | GB/T9872 |
| Apparent Density, ( $\mathrm{g} / \mathrm{cm}^{3}$ ) | $\geqslant 0.5$ | GB/T3402 |
| Volatile Content, (\%) | <0.3 | GB/T2914 |
| Temperature of Pyrolysis, ( ${ }^{\circ} \mathrm{C}$ ) | \$165 | GB/T2704 |
| Heat of Fusion, ( $\mathrm{J} / \mathrm{g}$ ) | <2 | DCS |
| Hardness, (Shore A) | $\leqslant 56$ | GB/T2411 |
| Sieve on 0.9 mm , (\%) | <0.1 | GB/T2916 |

## PACKAGING

CPE-135A is packaged in bags at 25 kg net.
